

# Leibniz AI Academy

How to obtain a Micro Degree in AI?

# Do we still need to master AI in the age of LLMs?

1. AI is so much more than LLMs.
2. LLMs are not the solutions to every problem.
3. To master AI, you need to know
  - the foundations, and
  - how to apply them in practice.
4. The best paid position in the future will mostly be people knowing how to develop the next foundation models (incl. LLMs)

# Why Leibniz AI Academy?

Learn from experts in the field

Foundational Knowledge in AI  
with practical applications of AI

Diverse expertise through external  
partners

Improve your job prospects with a  
certified specialization

# Which courses are offered?

Applications

Data science for design  
and engineering  
(Geyer)

Spatial Data Science  
(Sester & Rottensteiner)

Image Analysis I  
(Sester & Rottensteiner)

AI for Production  
Engineering  
(Dekena)

KI in der Lehrkräftebildung  
(Schanze)

KI in der Erwachsenen-  
und Weiterbildung  
(Robak)

AI for Health  
(Rosenhahn)

Specializations

Visual Analytics  
(TBA)

Automated Machine  
Learning  
(Lindauer)

Semantic Technologies  
(Auer)

Computer Vision  
(Rosenhahn)

Deep Learning  
Foundations  
(Sikdar)

Reinforcement Learning  
(Lindauer)

Foundations

Artificial Intelligence  
(Nejdl)

Machine Learning  
(Rosenhahn)

Foundations of Data  
Science  
(Lindauer)

Foundations of  
Mathematical Stochastics  
(Weber)

# Micro Credentials → Micro Degree

Master's Degree

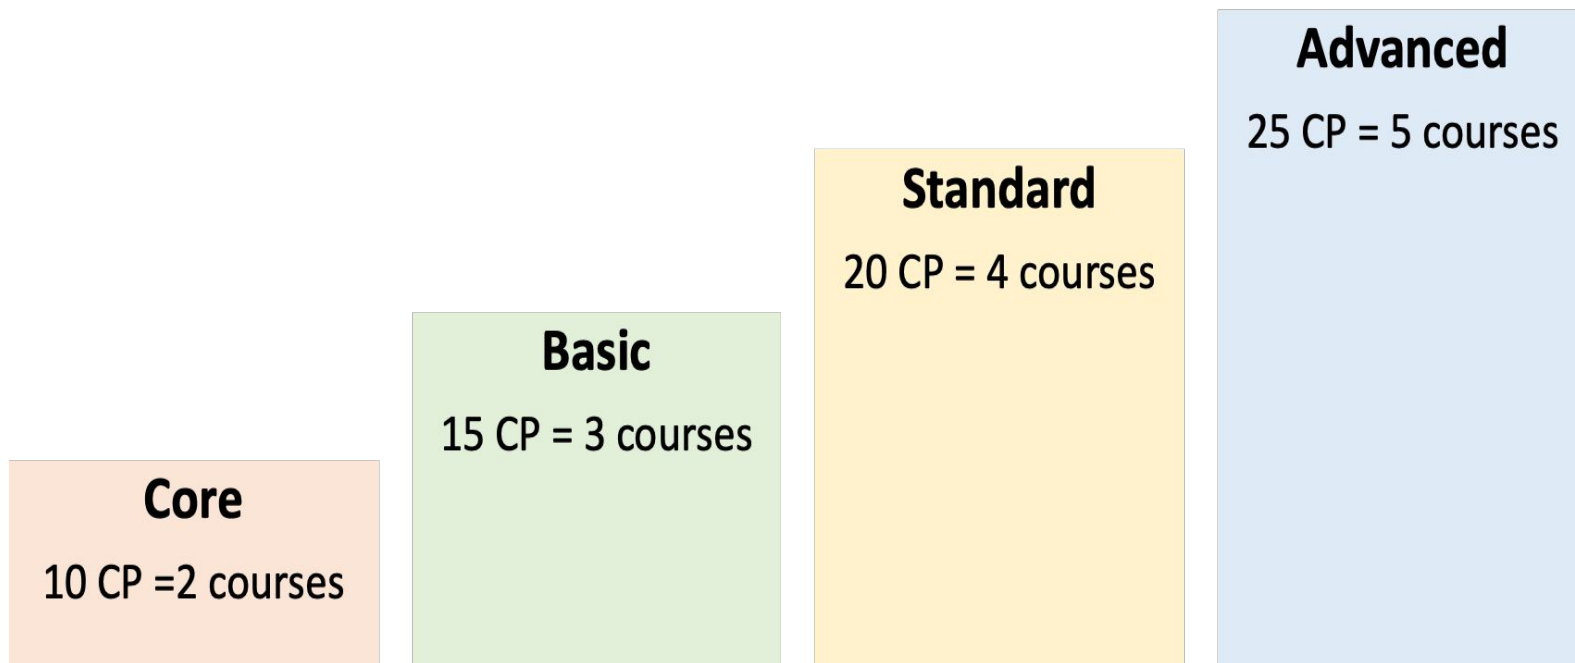

Micro Credentials  
(aka. courses)

Micro Degree

Your normal study program

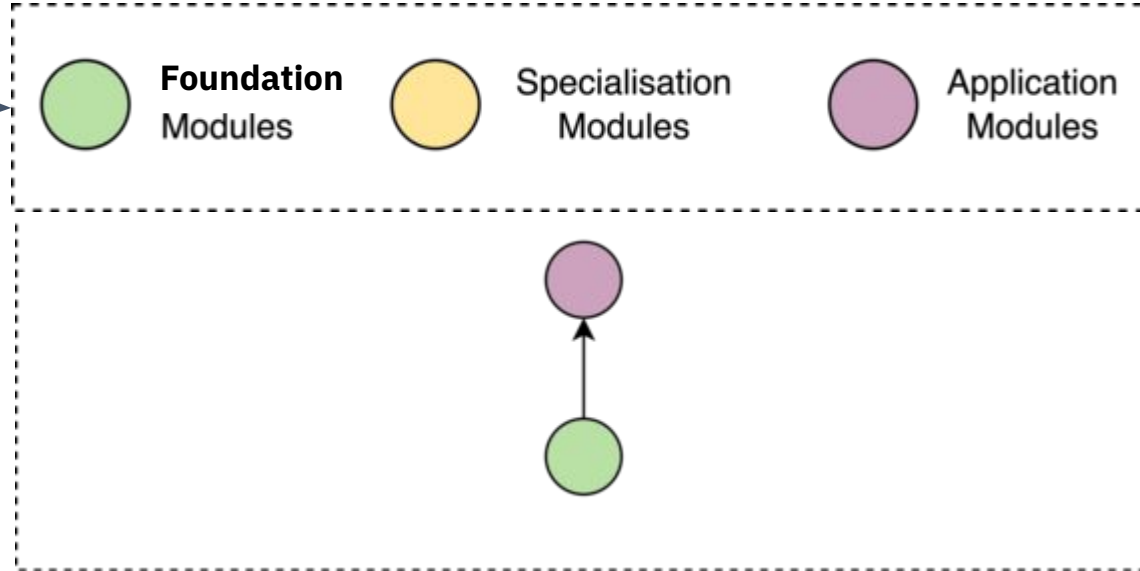

# Micro Degree Levels

# How to obtain a Core Micro Degree?

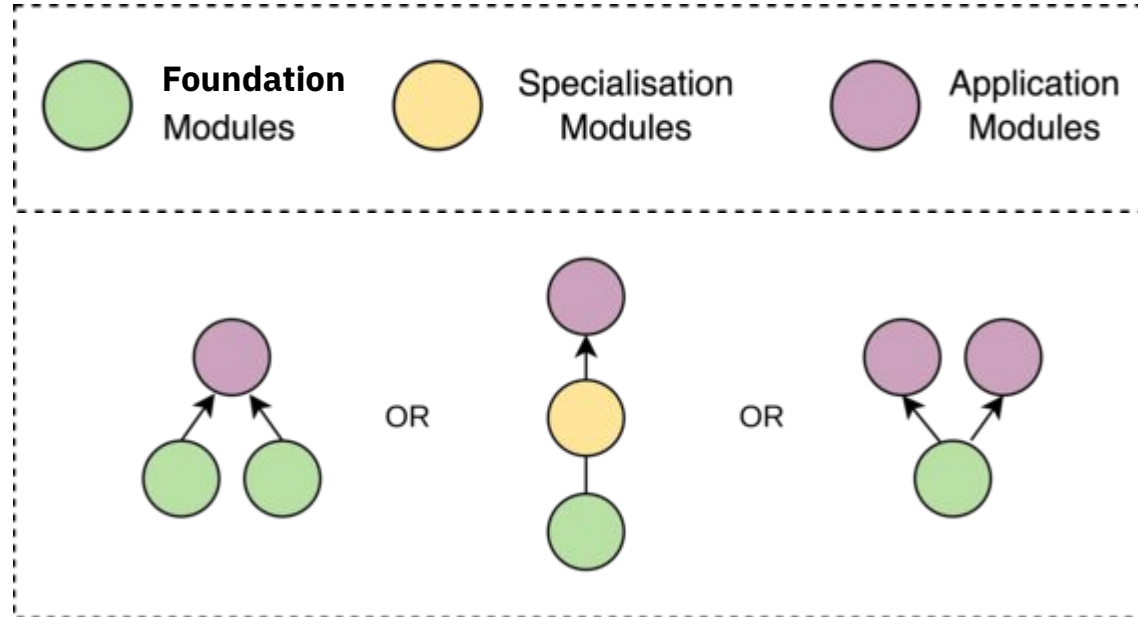

## Core Degree (10 ECTS)

Also known  
as micro  
credentials

# How to obtain a Basic Micro Degree?

## Basic Degree (15 ECTS)

# How to obtain a Standard Micro Degree?

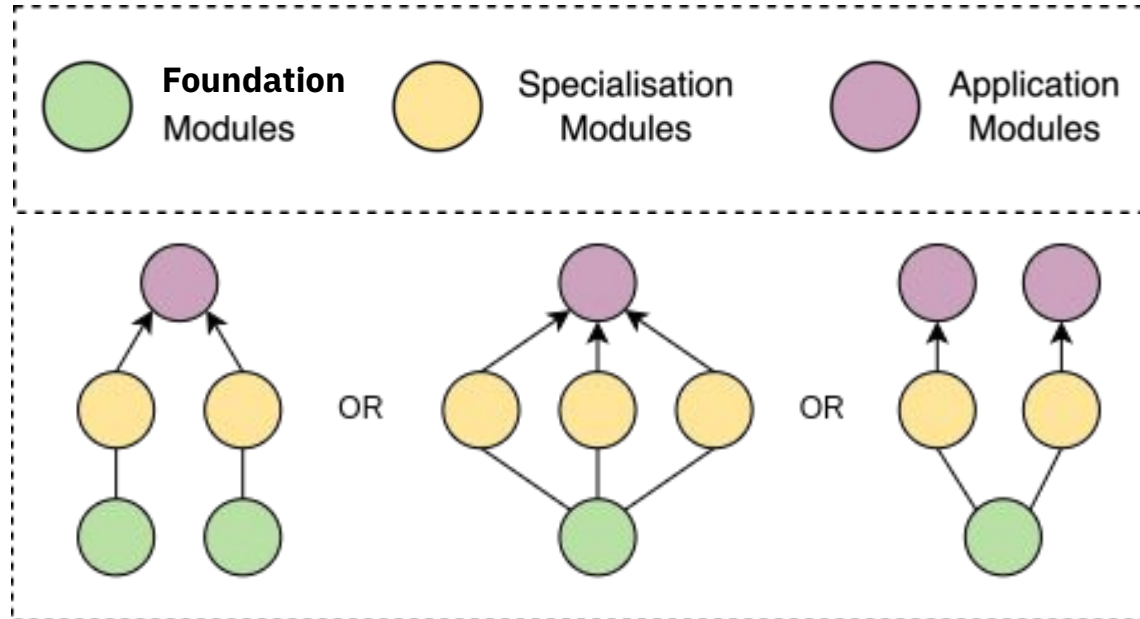

## Standard Degree (20 ECTS)

*\* We recommend for students with little CS background to focus on paths with more foundation and application modules.*

## How to obtain an Advanced Micro Degree?

## Advanced Degree (25 ECTS)

# Micro Degree at the Leibniz AI Academy

AI and  
Production

AI and  
Health

AI and  
Design

AI and  
Geodetic Science

AI and  
Education

The name of the micro degree depends on the final application course, you successfully complete.

# All Micro Degrees have Recommendations!

## An Example for the “Design and AI” Degree

**Core**  
 (10 CP =  
 2 courses)

**Basic**  
 (15 CP =  
 3 courses)

**Standard**  
 (20 CP =  
 4 courses)

**Advanced**  
 (25 CP =  
 5 courses)

Minimum required number of courses per category:

	Core (10 CP = 2 courses)	Basic (15 CP = 3 courses)	Standard (20 CP = 4 courses)	Advanced (25 CP = 5 courses)
<b>Applications</b> <div> <div>Data science for design and engineering</div> </div>	1	1	1	1
<b>Specialisations</b> <div> <div>Computer Vision</div> <div>Semantic Technologies</div> <div>Visual Analytics</div> <div>Deep Learning Foundations</div> <div>Reinforcement Learning</div> <div>Automated Machine Learning</div> </div>			1	2
<b>Foundations</b> <div> <div>Artificial Intelligence 1</div> <div>Machine Learning</div> <div>Data Science Foundations</div> <div>Stochastic Foundations</div> </div>	1	1	1	1

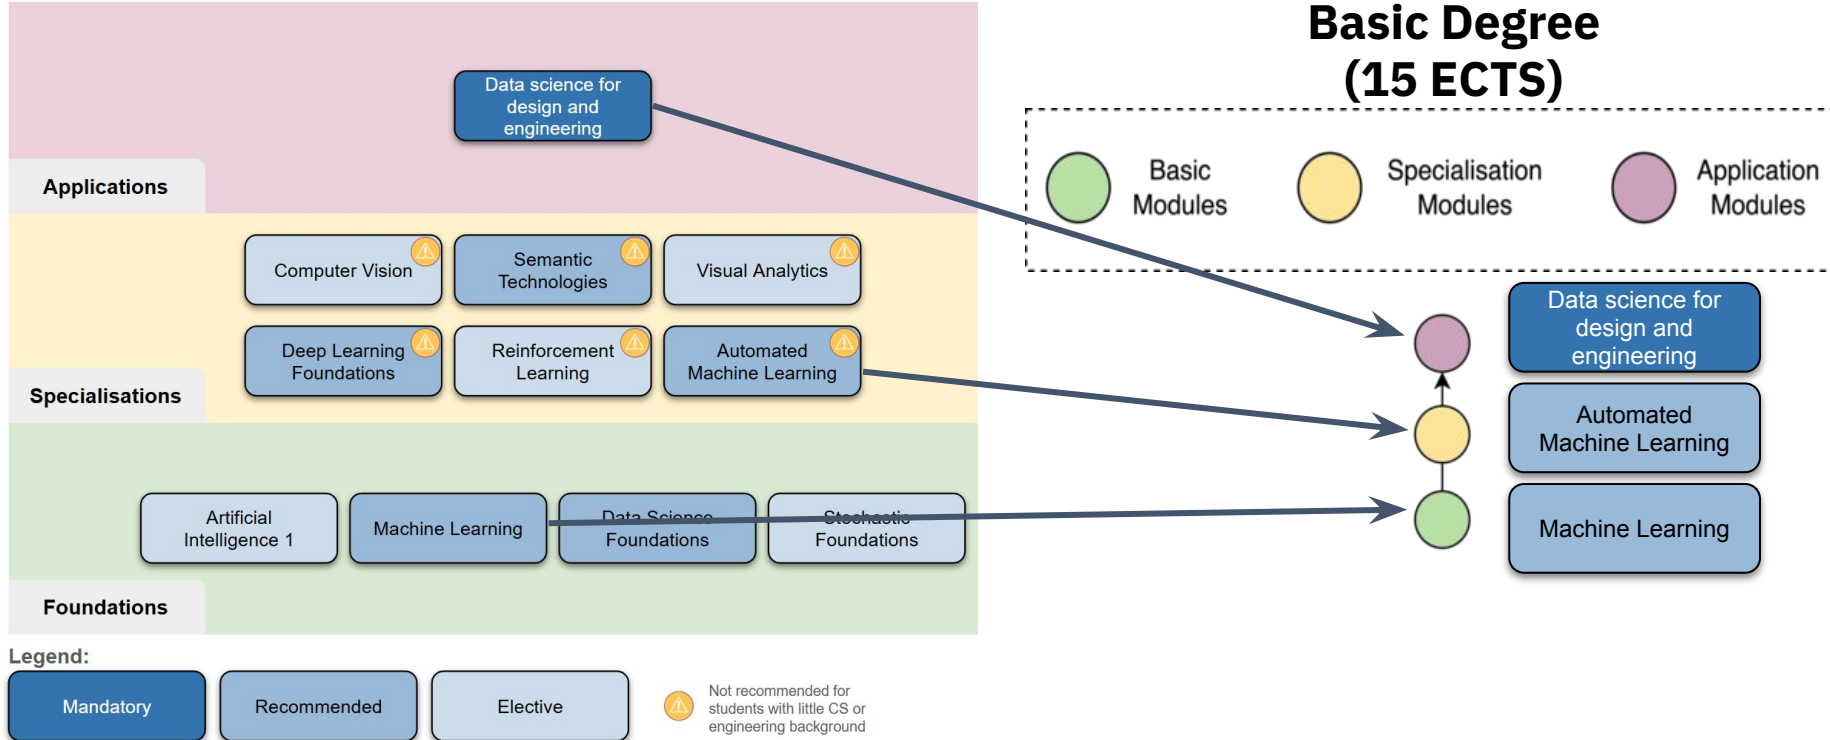

Legend:

Mandatory	Recommended	Elective
-----------	-------------	----------

Not recommended for students with little CS or engineering background

# How to combine?

## Important note:

- **All students at the LUH are eligible** for taking courses from the Leibniz AI Academy (regardless of their Master study program)
  - If a course is not offered by your faculty, talk with the professor in charge first and then write an **email to your examination office** s.t. **they register you for the exam** via QIS.
  - Exam registration procedure might change in the future!

# Workflow

## Important note:

- You can take the courses as part of **your study program** (e.g., “**Studium Generale**”) or as **additional courses** (i.e., not counting towards your Master degree)

# Workflow

## Important note:

- If you already have a micro degree of a lower level (e.g. Core), you can **upgrade it** by taking more courses (e.g., to Standard)

## Important note:

- First certificates can be obtained by May'25 from the **ZEW** (Schloßwender Straße 7, EG links, Sekretariat)
  - Get a appointment via [microcredentials-luh@zew.uni-hannover.de](mailto:microcredentials-luh@zew.uni-hannover.de)
  - You need your transcript (“Notenübersicht”)
  - The certificate will require roughly 2 weeks

Join us on Discord to exchange ideas,  
projects and experiences with other  
students. Link see <https://www.ai-academy.uni-hannover.de>
